Correct Solutions
www.correct.com.au

To whom it may concern:

As the Managing Director or CEO of a growing small business, all the problems and monkeys end up on your back.

During our first six years I took our business from one stand alone PC on my desk, to a network with five clients on SBS2000

Every printer or network glitch took me away from what I do best - growing our business

Once Correct Solutions became our IT partner, and took that monkey away from me, the business has shown annual growth again, and the network (now SBS2003 and larger still) is working better than ever

Sincerely,
Abel Metal Services Pty Ltd

Graeme McKimmie
