To Whom it may Concern,

We have recently changed over to your managed email services from our current provider.

In the past years, we have suffered an exponential increase in SPAM email messages with two of our email accounts receiving well over 100 bogus messages per day!

Filtering of these messages has consumed the time and resources of our staff immensely and despite our best efforts to employ anti-spam technologies, nothing has been successful in stemming the flow of spam until we changed to your services.

I would like to say how pleased we are with your service and the quality of your email system especially the reduction in the unwanted SPAM messages.

Kind Regards

Robert Turriziani

Head Estimator
